REVERSIBLE TILT DITCHING BUCKETS

- Entirely made of **Hardox® 450 steel**. Lighter and more durable than commercial steel.
- **90-degree pivot angle** (45 degrees on each side). Increases operating versatility regardless of the excavator's position and reduces the support staff required.
- The **reversible Cotech ears** enables front digging under obstacles or near building foundations.
- Hydraulic cylinders and central pivot axis mounted on greasable bushings for superior operating precision.
- **Compatible with the majority of excavator manufacturers and models.**
